

# How to measure your skylight

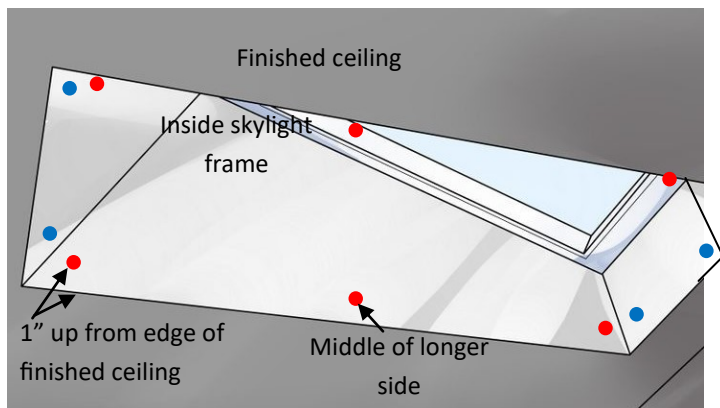

Fig. 1

## Measuring your skylight

1. On the inside of the skylight cavity, on the drywall, in the corners, place a mark about an 1" up as shown in (fig. 1) from where the corner of the finished ceiling meets the skylight frame, as shown where the dots are in (fig 1) also on the longer side of the skylight frame in the middle place a mark about 1" up from the finished ceiling edge.
2. You will need to do this in several spots as shown in (fig 1).
3. As shown in (fig 2.) now measure from drywall to drywall about an inch up from finished ceiling, around those marks that you made in the skylight cavity about an 1" up on the drywall from, A1. to A1., A2. to A2., A3. to A3., B1. to B1. and B2. to B2.

Place measurements below
